DOES THE BIBLE SAY A SNAKE \_\_\_\_\_?

*“When you and I open the Bible in Genesis, we immediately want to know the answers to our contemporary questions, the ones we raise from our worldview and our cultural experience. We want to know what the Bible says about the age of the earth, the fossil records, dinosaurs, Darwinism, macroevolution versus microevolution, genomes and the DNA sequence of organisms, amino acids, light years, and carbon dating. We open the pages and want to have answers for all the things that consume our current clashes between Christianity and science. However, these questions were not the concerns of the original audience that God was communicating to. They weren’t the reason or purpose behind what he communicated.”*

*“We need to begin our reading not with the questions we may have today, but with the questions they had back at that time. God was communicating to the them in a way that made sense to them based on the world in which they lived.”*
